**TEAM SPECTO:** Fleet administrator, Antoinette O'Flynn, from Glanworth, with her Specto colleagues, Billy Sullivan (general manager) and workshop foreman, Irek Szpin. (J-d)

Castlelyons/Conna), Specto supplies fleet management and repair/maintenance services to commercial vehicle operators. With the implementation of the Road Safety Authority Commercial Vehicle Roadworthiness Bill 2012, Specto recognises the significance and importance of providing its customers with a very high level of service, expertise and knowledge.

### THE FACILITIES AND THE EXPERTISE

Specto technicians work within a 13,000 square

feet facility just off the M8 (junction 15) between Fermoy and Rathcormac. The site is served by full length drive-through maintenance bays (plus wash bay), fully equipped tyre changing area, a 5 tonne gantry crane, heavy duty truck/bus wheel alignment system and a heavy duty roller brake testing machine.

Diagnostic systems are state-of-the art and include: Texa/Knorr Bremse/Haldex. Extensive onsite parking is provided with drivers having ready

access to shower, canteen and toilet facilities - there's the added peace of mind of 24 hour CCTV coverage.

SERVICE AND MAINTENANCE | SPECIALISTS PROVIDING A HIGH QUALITY SERVICE AT COMPETITIVE RATES

SERVICING THE FLEET: Another busy day for the technicians at Specto.

(Continued from  
page 26)

#### REPAIR, SERVICING AND TESTING

Bodywork repairs and body building/fabrication in addition to tank and tanker repairs/servicing are a speciality at Specto. The workshop is also kitted out to provide a range of periodic safety testing (roller brake testing and CVR preparation). Maintenance is available for all makes and models. Extensive tyre checking is carried out with particular attention given to wheel alignment (truck/trailer).

Keenly aware that drivers can experience mechanical failure at any time, Specto operate a 24 hour breakdown service - which has proven invaluable. This is in addition to the extremely busy workshop that opens at 8am and remains operational until midnight.

From its inception, the company has been customer focused and this has resulted in valuable repeat business from customers who don't look beyond the comprehensive range of services provided by Specto - services that

include: auto electrics upgrades, engine/gearbox reconditioning and part sales.

#### FLEET ADMINISTRATION

This has been another growth area for Specto in recent years and increased demand seems likely. The fleet management package includes: reporting, defect reporting, fuel efficiency monitoring and test schedule management. Specto believes in being

pro-active and in many instances, experienced technicians head off a variety of potential mechanical problems which results in major savings to clients.

#### RESPECT FOR CUSTOMERS AT ITS CORE

Whether dealing with individual HGV owners or international hauliers, the core principles of exceptional service and competitive rates have always applied at

Specto. 'Specto Witness' is another innovation that provides every client with an audio/visual account of all repairs/modifications carried out. It's upfront, transparent and customer friendly.

With Specto there are never any unpleasant surprises - they do what needs to be done and it's all recorded for the benefit of the customer.

*Specto would like*

*to take this opportunity to thank all of our customers for your continued support.*

**SPECTO - LOOKING  
AHEAD WITH  
CONFIDENCE**

Standing still is not an option for the directors and employees of Specto. With a wealth of expertise and experience behind them, this progressive organisation is well placed to capitalise on Ireland's economic recovery and establish itself as a market

leader when it comes to keeping you and your fleet on the move and on the go.
